## Research Question

“How can the communication of information about data policy in Smart City projects be redesigned to be more transparent for citizens?”

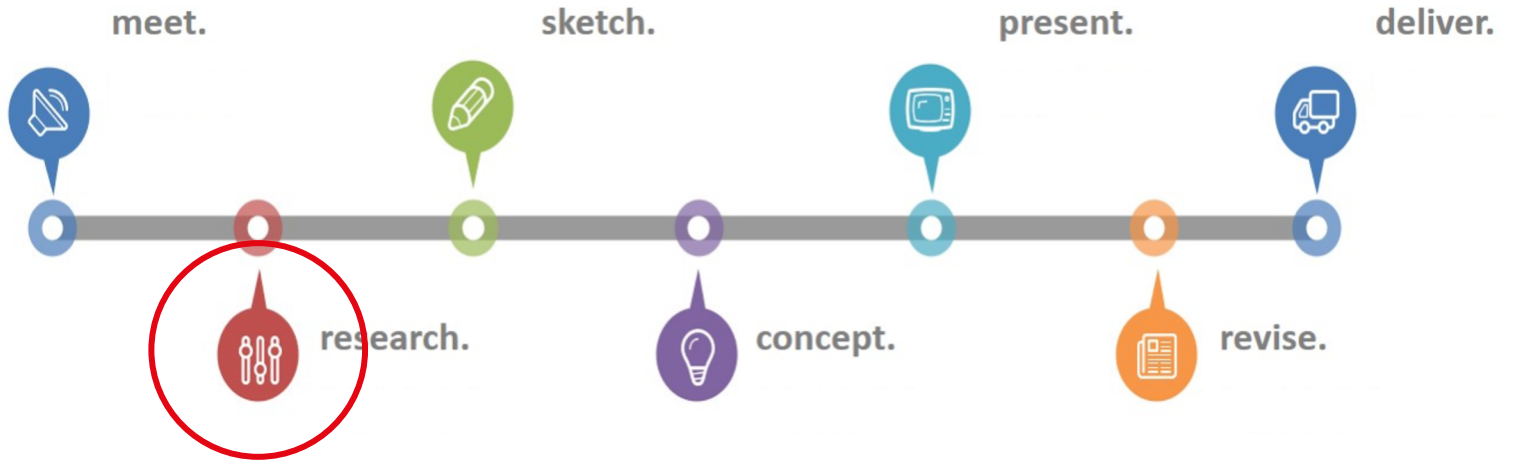

# Design Process

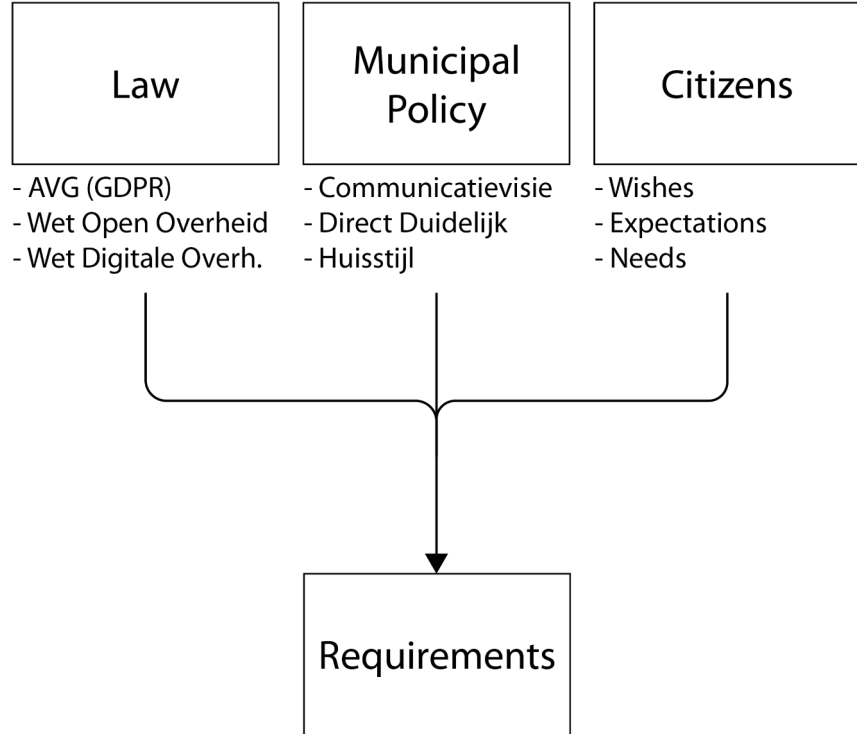

# Design Process

# Research

Collecting requirements from the stakeholders

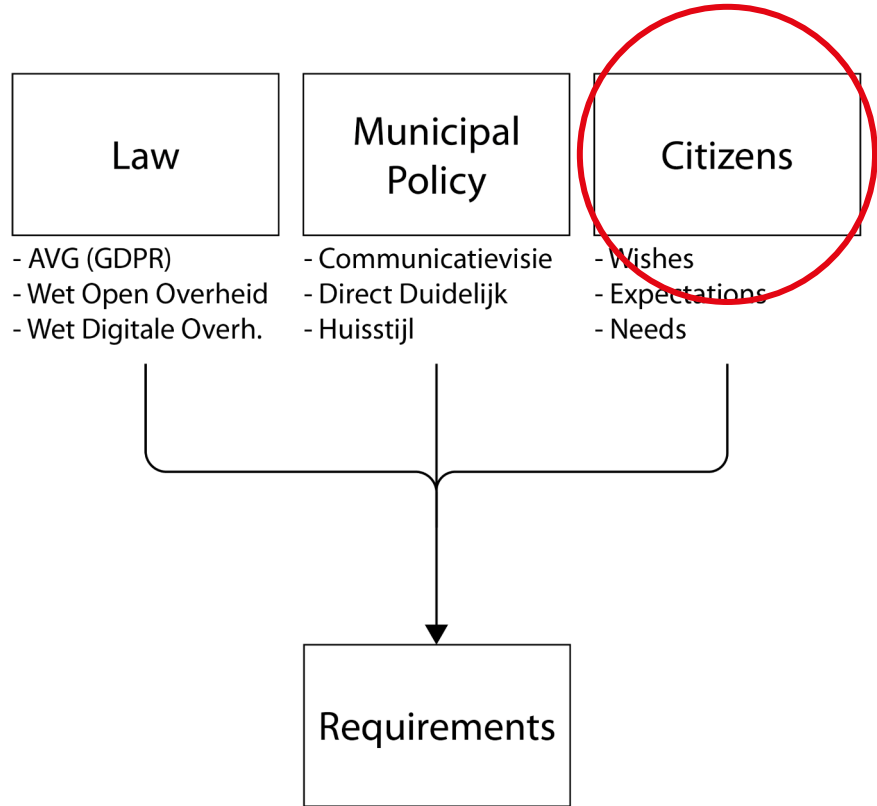

# Research

Collecting requirements from the stakeholders

Focus of this talk on citizens

## Citizens Perspective

15 semi-structured interviews with 16 individuals from different backgrounds (~ 1 hour)

- Elders
- Students
- Data specialists
- Citizen with immigration background
- Citizen with social security
- Entrepreneurs
- Working class citizen

## Citizens Perspective

4 questions that that needed to be answered:

1. **What knowledge do citizens have already** about data collection and Smart City projects?
1. **Which information do citizens still need** of Smart City projects?
1. **How do they want to receive** that information?
1. **How do they want to engage** with that information?

# Citizens Perspective

Interviews structured in 3 parts:

- Questions about data in general
- 6 different examples of Smart City projects in Enschede
- Questions about communication and engagement in general

## Insights from the interviews

Which information do citizens have already about data collection and Smart City projects?

## Insights from the interviews

Which information do citizens have already about data collection and Smart City projects?

- Mixed knowledge
- Background

When an example was shown

- Filling in missing information with own experience
- Not always correct

## Insights from the interviews

Which information do citizens still need of Smart City projects?

## Insights from the interviews

Which information do citizens still need of Smart City projects?

Based on

which information was mentioned first by the participant

which information changed an opinion on a topic

## Insights from the interviews

Which information do citizens still need of Smart City projects?

- WHO, WHAT, WHY
  - Trust in the collector
  - Which kind of data is collected of them
  - Why it is collected of them

Based on this the participant forms an opinion about the data collection

Connection between them

## Insights from the interviews

Which information do citizens still need of Smart City projects?

- WHO, WHAT, WHY
  
- WHEN, WHERE
  - Indication of when it is collected
  - Indication of where it is collected

Location and timing of data collection have influence on the opinion of the participant on the collection

## Insights from the interviews

Which information do citizens still need of Smart City projects?

- WHO, WHAT, WHY
- WHEN, WHERE
  
- HOW:
  - Stored how long
  - Who has access/has no access
    - General distrust to commercial parties and combining data
  - How is it collected
  - How is it used to achieve the goal

## Insights from the interviews

Which information do citizens still need of Smart City projects?

- WHO, WHAT, WHY
- WHEN, WHERE
- HOW:
  
- Everything else
  - Laws
  - Policies
  - The underlying technology
  - Etc.

## Insights from the interviews

How do they want to receive that information?

## Insights from the interviews

### How do they want to receive that information?

- Differs per Smart city project and medium of data collection
  - Relevant/On location
  - Minimal effort in getting to the information
  - Minimal effort in understanding the information

## Insights from the interviews

### How do they want to receive that information?

- Differs per Smart city project and medium of data collection
  - Relevant/On location
  - Minimal effort in getting to the information
  - Minimal effort in understanding the information
  
- When newly introduced an active approach from the collector to give the information beforehand

## Insights from the interviews

How do they want to engage with that information?

## Insights from the interviews

How do they want to engage with that information?

- Dependent on agreeing with the collection or not
  - Minimal amount of effort

## **Influence on transparent communication**

Actively inform citizens

A citizen should be notified of data collection

Who, what, where, when and why

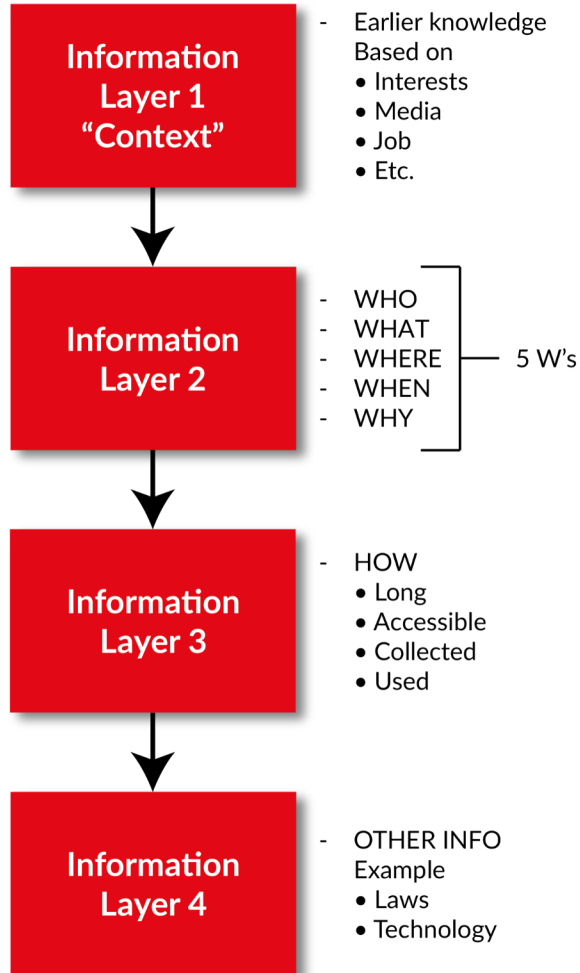

The How's of the data are readily available.

All relevant information is accessible

Minimal amount of effort

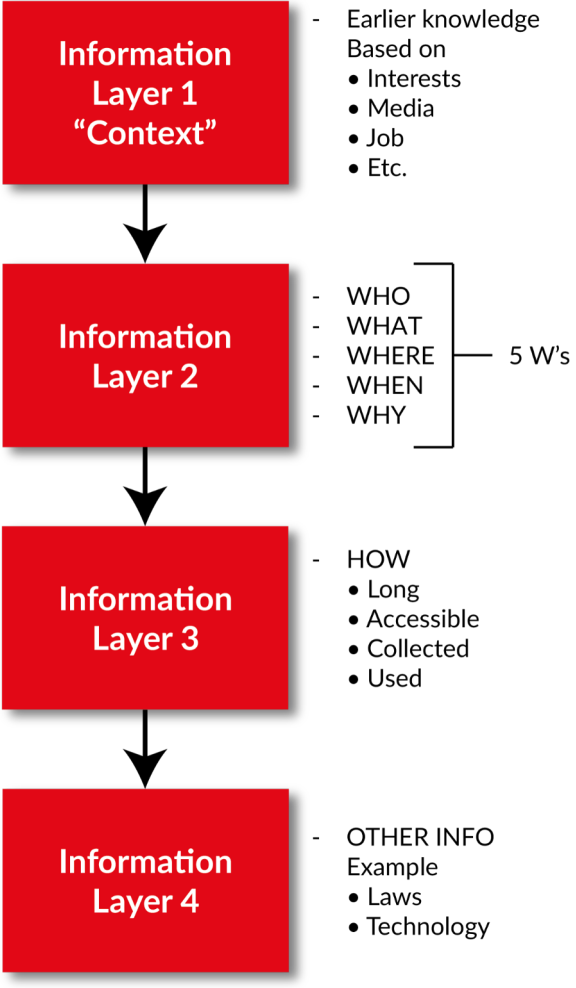

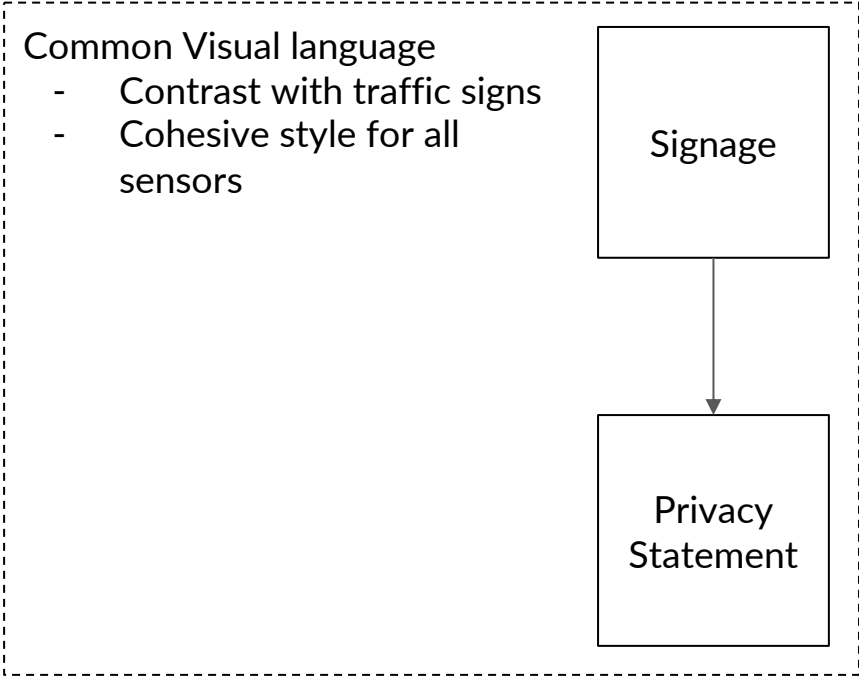

# Layers of info

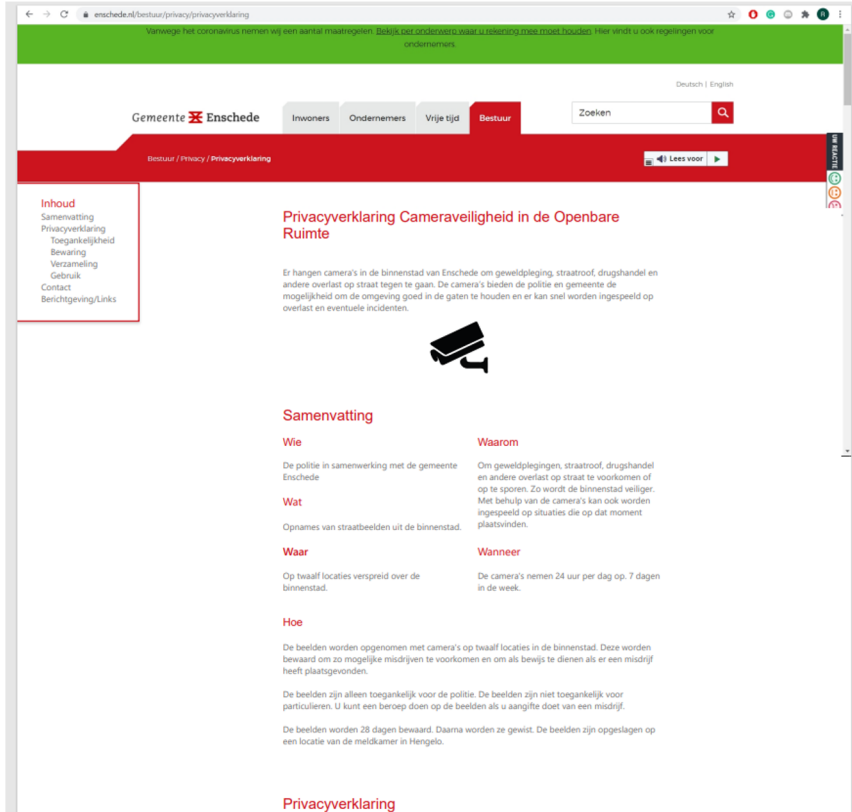

# Design (WIP)

# Design - Privacy Statement

Information Layer 1  
"Context"

- Earlier knowledge Based on
  - Interests
  - Media
  - Job
  - Etc.

Information Layer 2

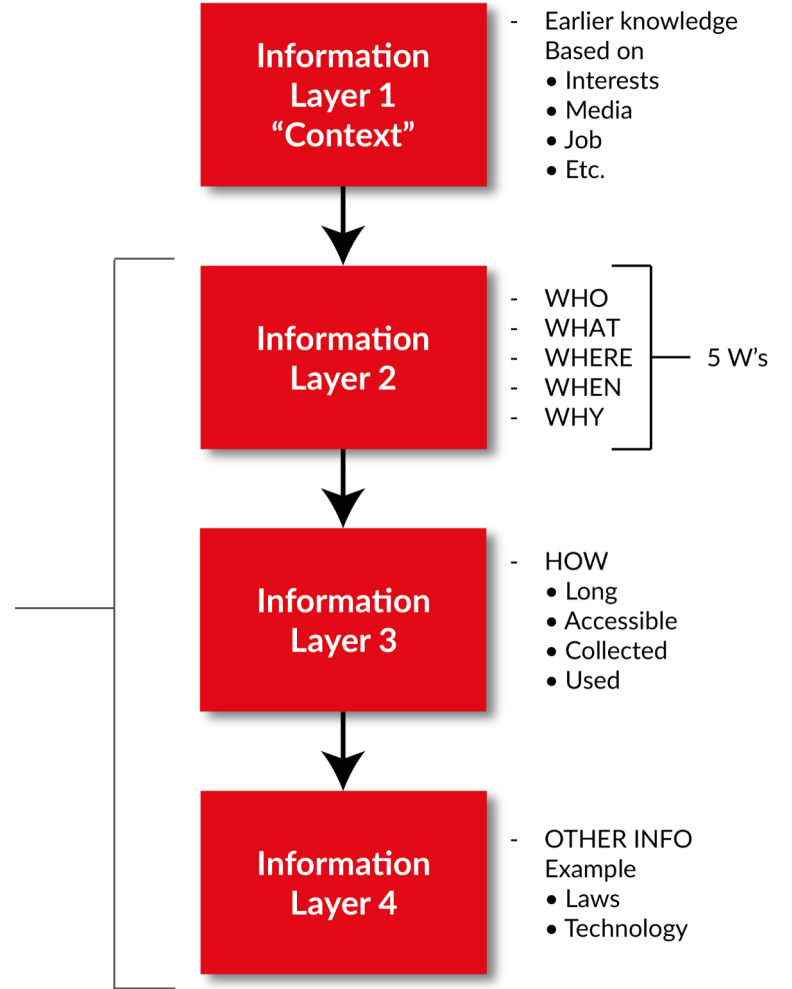

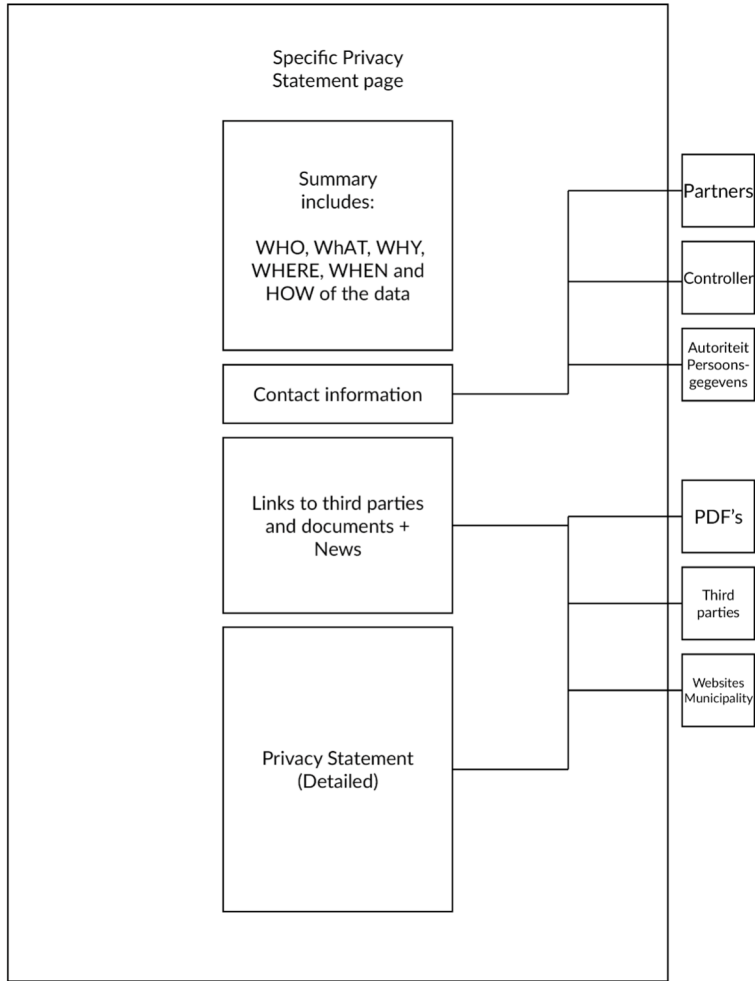

- WHO
  - WHAT
  - WHERE
  - WHEN
  - WHY
- 5 W's

Information Layer 3

- HOW
  - Long
  - Accessible
  - Collected
  - Used

Information Layer 4

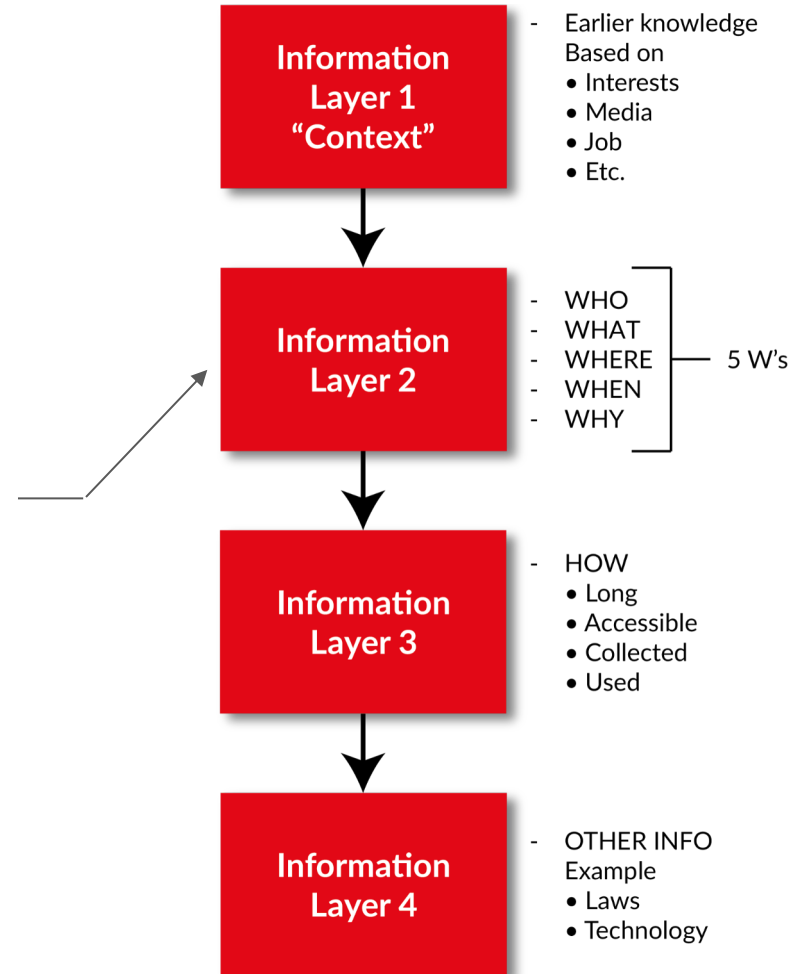

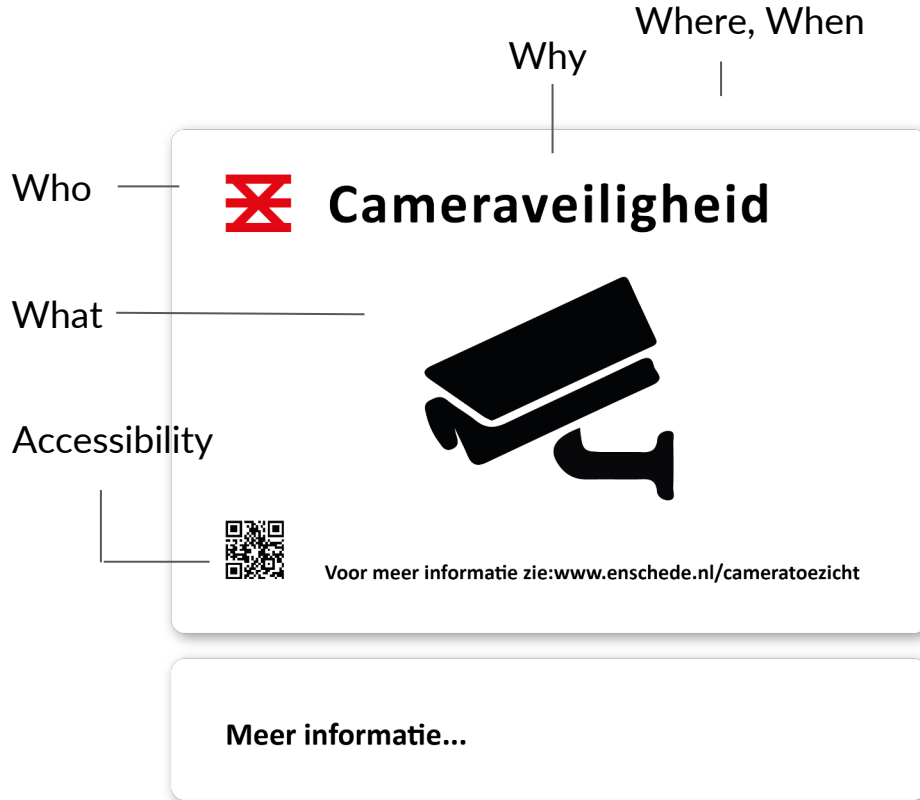

- OTHER INFO
  - Example
    - Laws
    - Technology

# Design - Signage

# Discussion
