# MINOR(S)

- High-Tech Human-Touch minor: Science 2 Society

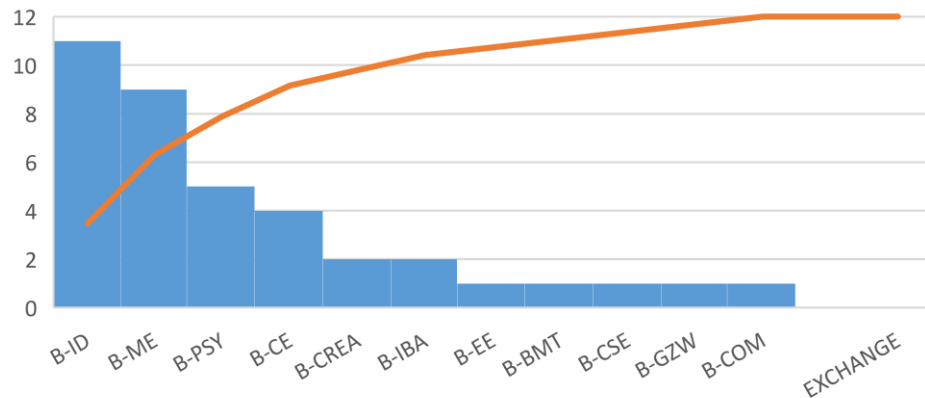

- Collaboration of faculties ET and BMS

# FOR WHOM?

- Students from all programmes who:
  - Want to make a project their own
  - Are not afraid to take action
  - Are flexible
  - Want to work in an international and multidisciplinary team
  - Want to work with open-ended meaningful societal/research problems!

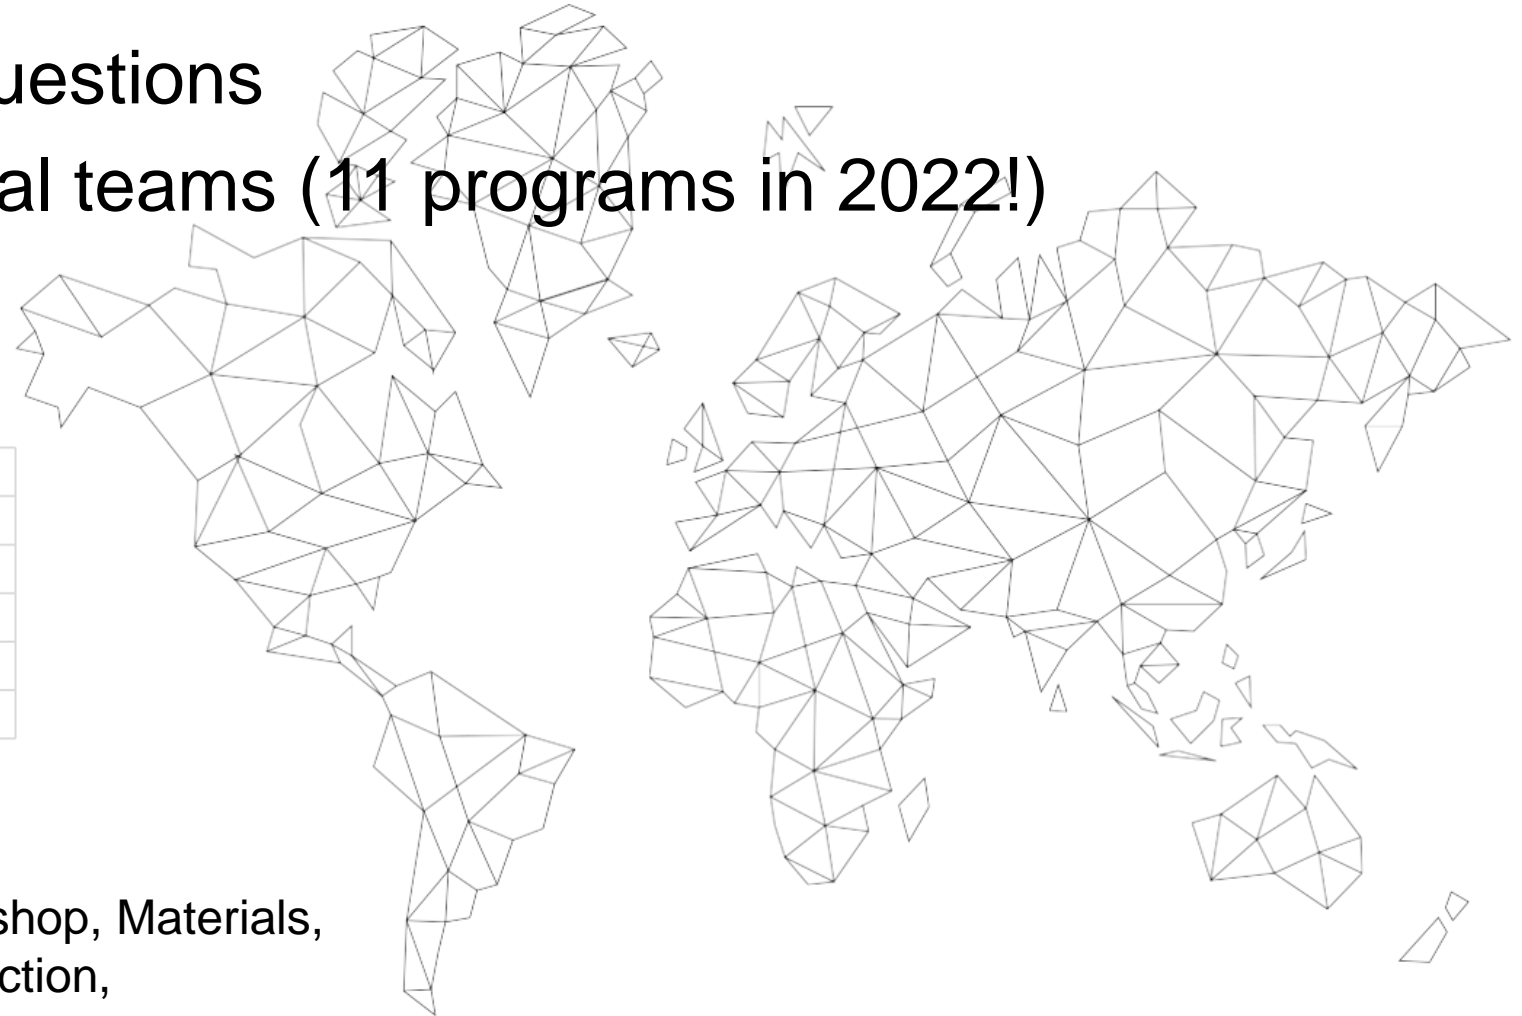

- Find answers to complex questions
- Multidisciplinary international teams (11 programs in 2022!)
- From Idea to Society

From Idea to Prototype 2022-2023

Research, Development,  
Design, ..

Workshop, Materials,  
Interaction,

# APPROACH

- Work with your group on a real problem (Challenge-Based Learning)
  - Provided by companies or research departments
  - Relevant for society
  - Open-ended problems
- Determine your own challenge
  - How will you approach the problem
  - How to achieve your proposed approach
  - Be curious
  - Learn together with the challenge provider

# CHALLENGE BASED LEARNING

## VOICE

CBL gives voice to all the **Learners** community members, administrators, teachers, and students. CBL helps the Learners to explore meaningful Ideas, build contextual learning informed by multiple perspectives. The result is confident learners, and better solutions.

## CO-CREATION

All the **stakeholders** take an active role in participating in the challenge and the learning experience. The framework supports co-creation

CBL in a nutshell: <https://vimeo.com/226547662>

## ENGAGE • INVESTIGATE • ACT

Challenge Based Learning provides the perfect framework to develop and support personalized learning (PL). The four key ideas of PL are infused into the CBL experience.

## SOCIAL CONSTRUCTION

Creating social and emotional connections between the **Learners** is a foundational idea of CBL. The Learners move in and out of collaborative groups to investigate a Challenge, develop solutions and put them into action.

## SELF-DISCOVERY

CBL allows full participation, reflection, and self-discovery. As the **Learners** work together to solve Challenges, they are learning about themselves and developing a personal learning framework that will equip them to face future Challenges inside and outside of the classroom.

And the CANVAS site of the minor

# PROJECT

- Minor is one big project
  - All courses are integrated
- Project time is not in the schedule
- DesignLab is available to you
- Self-supporting

# EXAMPLE CASES PREVIOUS YEARS

# COLOR IN ACTION

- **A peacock**
- Feather opening

# COMMUNICATION AUTONOMOUS CARS

# STRESS AT THE WORKPLACE

## IMPROVING THE AWARENESS OF STRESS

Raising awareness of stress in a work environment. Cost of stress: 2 billion euros in 2016 for employers, 7 million days required away from work due to work-related stress, €7800 per absent employee. Solution: VIVIFY, a user-friendly system to raise awareness of stress.

### PROGRAM

VIVIFY will enable users to monitor their heart rate. The user can tap on the graph to add recollection notes to their peaks. This way users can be more aware of how much stress they go through.

### SMARTWATCH

Working alongside smartwatch sensors, the watch will be used to measure and record the user's heart rate, which can be signs of work-related stress.

### APPLICATION

Supporting smartphone application works alongside system and watch to help the user continue the awareness system outside of the work environment.

e-Health group

# MANO: RELIABLE HAND FORCE MEASUREMENT

*Helping Physiotherapists assess the hand function of people with Impairments*

# DISABLED PEOPLE INCLUSION

# IBILIGHT

# SUPPORT

- Problem Provider
  - The organization that provides the problem. Treat the providers as members of the team and learn together!
- Process tutor
  - Experienced Staff Members that help you with the process and act as a bridge between the student and the problem provider if needed. **We strongly encourage you to have weekly meetings!**
- Project group (students)
  - Responsible to use the network of people offered by us!
  - Responsible to use your own network!

# EXPLORE

- Use the UT community

# ORGANISATION

- Coordinators:

# FINAL REMARKS

- **THIS IS FOR REAL!**
  - Think realistic
  - Be flexible
  - Ask for feedback
  - Don't expect us to know the answer!
  - Different groups might get different answers to the same question
  - Timely raise your questions or concerns
  - Keep in mind that you have to opportunity to continue your challenge in the second part of the minor!
