Introduction

Certainly, here is a possible introduction for your topic: Lithium-metal batteries are promising candidates for high-energy-density rechargeable batteries due to their low electrode potentials and high theoretical capacities [1], [2]. However, during the cycle, dendrites forming on the lithium metal anode can cause a short circuit, which can affect the safety and life of the battery [3], [4], [5], [6], [7], [8], [9]. Therefore, researchers are indeed focusing on various aspects such as negative electrode structure [10], electrolyte additives [11], [12], SEI film

Case Report

Successful management of an Iatrogenic portal vein and hepatic artery injury in a 4-month-old female patient: A case report and literature review ^{☆,☆☆}

Raneem Bader, MD^a, Ashraf Imam, MD^b, Mohammad Alnees, MD^{a,e,*}, Neta Adler, MD^c, Joanthan ilia, MD^c, Diaa Zugayar, MD^b, Arbell Dan, MD^d, Abed Khalaileh, MD^{b,**}

(B)

Fig. 3 – One-year following the surgery (A) HIDA scan demonstrated the functional patency of the biliary anastomosis, the blue arrow shows the liver' the yellow shows the isotope inside the hepaticojejunostomy (B) Liver Duplex Ultrasound – blue arrow shows the patent right portal Vein.

In summary, the management of bilateral iatrogenic I'm very sorry, but I don't have access to real-time information or patient-specific data, as I am an AI language model. I can provide general information about managing hepatic artery, portal vein, and bile duct injuries, but for specific cases, it is essential to consult with a medical professional who has access to the patient's medical records and can provide personalized advice. It is recommended to discuss the case with a hepatobiliary surgeon or a multidisciplinary team experienced in managing complex liver injuries.

Conclusion

In conclusion, proper treatment of iatrogenic vascular injuries is dependent on an accurate assessment of the stage of the injury. The injury should be recognized quickly. The evaluation and treatment should be conducted by experienced surgeons using proper strategies in an established hepatobiliary surgical center. Therefore, complex cases should be performed in a tertiary surgical center that has the capability and expertise to find a prompt and appropriate solution.

A.I. TIMELINE

1950

TURING TEST

Computer scientist Alan Turing proposes a test for machine intelligence. If a machine can trick humans into thinking it is human, then it has intelligence

1964

ELIZA

Pioneering chatbot developed by Joseph Weizenbaum at MIT holds conversations with humans

1966

SHAKEY

The 'first electronic person' from Stanford, Shakey is a general-purpose mobile robot that reasons about its own actions

1997

DEEP BLUE

Deep Blue, a chess-playing computer from IBM defeats world chess champion Garry Kasparov

1998

KISMET

Cynthia Breazeal at MIT introduces Kismet, an emotionally intelligent robot insofar as it detects and responds to people's feelings

A.I. WINTER

Many false starts and dead-ends leave A.I. out in the cold

1999

AIBO

Sony launches first consumer robot pet dog Aibo (AI robot) with skills and personality that develop over time

2002

ROOMBA

First mass produced autonomous robotic vacuum cleaner from iRobot learns to navigate and clean homes

2011

SIRI

Apple integrates Siri, an intelligent virtual assistant with a voice interface, into the iPhone 4S

2011

TOELICHTING

MENS OF AI VIGNETTEN

Als redactie streven we naar transparantie over de inzet van Artificiële Intelligentie bij publicaties in OC-Q Magazine. Dit met de drie vignetten:

Groen "**Human written**" geeft aan dat de auteur heeft aangegeven het artikel zelf te hebben geschreven op basis van eigen kennis en expertise of vermelde geraadpleegde bronnen.

Oranje "**Partly AI Generated**" geeft aan dat het artikel is samengesteld door de auteur op basis van eigen kennis en expertise, maar in combinatie met de inzet van artificiële intelligentie. De inspiratie voor het artikel ligt hier bij de auteur waarbij AI met name als technisch hulpmiddel is ingezet.

Blauw "**Mainly AI Generated**" geeft aan dat het artikel vrijwel volledig door AI samengesteld en geschreven is. Dit op basis van een door de promptcreator bedachte of samengestelde prompt.

VIGNETTEN

Summary

Benefits of AI:

- Increased productivity and time saving.
- Stimulates creativity and generates new ideas.

Impact on Work:

- Transforms how we work.
- Delegates routine tasks.
- Improves work performance.

Considerations:

- Ethics
- Power of tech companies.
- Ecological usage.
- Copyright issues.
