

IN THE SPOTLIGHT

TEACHER PROFESSIONALIZATION

With the UTQ (BKO), the UT maintains a quality standard of its teaching. However, development in one's teaching and learning shouldn't stop there! Within the Teaching Academy we believe that it is vital (and fun!) to keep developing your teaching and education at a post-UTQ level, in what we refer to as "**Teacher Professionalization**". This concept is also relevant to keep up with educational developments. Here, we aim for our staff to develop a multi-annual plan, in which the learning opportunities are set out and resources are discussed. These plans could also be carried to a department level, and as such, grow with your colleagues.

Several sources are available to boost your professionalisation, ranging from [courses](#) from the UT Career Centre, to using [CELT toolboxes](#). Additionally, funds are available to launch an education innovation project, currently there are already several [WSV innovation projects](#) being ran. To foster teacher professionalization in BMS, the Teaching Academy wants to introduce a new offer to contribute to this: learning communities. Here, you and your colleagues together can experiment and grow in a certain domain, like Challenge Based Learning, or Blended Learning. Would you like to know more about these topics? Then we advise you to attend the events on the 26th and 28th of October. We hope to soon invite you to join these communities, let's innovate together!

UPCOMING EVENTS

13 Oct 15:00 | E!Geo - Learning Analytics | [Sign up at ITC](#)
