

WHO SHOULD BE IN:

- At least one from all levels: students, phd students, support, professors
- Council with students, academics, support staff
- E-learning specialists and educational consultants

SUPPOSE... THE UT WOULD HAVE A SOUNDING BOARD FOR INNOVATION OF EDUCATION. WHO SHOULD BE IN? WHAT SHOULD THEY DISCUSS?

REMARK:

Depends on what problem this 'board' is a solution to. There is never a lack of ideas, but there is a lack of 'doorpakken', and actual ownership.

INNOVATION OF EDUCATION:

- Interdisciplinary innovation projects
- Learning: Life Long Learning, Learning while working, Continuous education
- Trends: Artificial Intelligence, Hybrid education [suggestion SEG IoE: adapt this topic to blended education as this is the focus of the UT]; Learning analytics
- All with an eye for practical solutions and ideas

DEVELOPMENT OF STAFF:

- Attention for professional development (collaboration, communication) versus development in expertise.
- Career planning for both WP and OBP
- Official time for UTQ
- Attention for education in hiring new academic staff

REWARDING AND RECOGNIZING

- Policy for scholarships and prizes related to education
- Top down incentives- reward innovation of education in time, money and appreciation

COLLABORATION WITH MBO AND HBO

COLLABORATION BETWEEN DEPARTMENTS:

- Openness and communication (stop the archaic barriers and systems)
- Relation between OZ and LLL
