

Hello!

My name is Chantal Ermling and I am 22 years old. I am currently writing my bachelor thesis in Industrial Engineering and Management and will continue with my master's here at the UT next year.

In the last couple of years, I have been active in multiple associations and organizations such as Phoenix Lacrosse Enschede, the University Innovation Fellows and S.A. Stress. In the academic year 2022/2023 I had the privilege to do a board year as the chairman of S.A. Stress. During the different types of activism, I had already the chance to learn a lot about our university and faculty. I would like to continue this journey as a member of the faculty council and create an impact in the name of the students of BMS. It is important to me that the interests of staff and students are being aligned to shape good decisions for everyone involved.
