

Hello there! My name is Jean-Miguel and I am a master student in PSTS (Philosophy of Science, Technology and Society). I did my bachelor's in Philosophy and in History in Grenoble (France). Apart from my studies I am active within the PSTS and BMS community at the UT. This academic year I did a part time board year at WTS Ideefiks, the study association of MSc PSTS. As Educational Affairs I am responsible for different activities (PhiloFilm series with Concordia, Living Room Philosophy series, Media Club, collaborations with Studium Generale...). Aside from that, I am also a guest member of the programme committee of PSTS. Throughout my studies, I saw the importance of student representation in participatory bodies, at large and within the faculty, in facilitating students' initiatives and voice their concerns. Because of that I would like to contribute to student representation on a faculty-level next year!
